

I am opposed to weakening Wisconsin's No Call List for several reasons. Incessant, unwanted sales calls detract from quality of life, quality family time, and peace of mind. Sales calls also interfere with the reception of emergency and family calls so vital to everyday life. Furthermore, some telemarketing calls are borderline fraudulent pitches and claims, so I respectfully request that you keep the law intact and unchanged to protect the elderly and general population from undesirable intrusions into people's lives. Thank you.
